

MANAGEMENT'S DISCUSSION & ANALYSIS FOR THE YEAR ENDED DECEMBER 31, 2024

March 20, 2025

Management's Discussion and Analysis

This management's discussion and analysis ("MD&A") of operating and financial results of Highwood Asset Management Ltd. ("Highwood" or the "Company") is dated March 20, 2025, and is based on currently available information. It should be read in conjunction with the audited consolidated financial statements and accompanying notes for the years ended December 31, 2024 and 2023 and the annual information form for the year ended December 31, 2024. Unless otherwise noted, all financial information is presented in Canadian dollars, and is in accordance with International Financial Reporting Standards (IFRS). Additional information can be found at www.sedarplus.ca and www.highwoodmgmt.com.

Highwood's management is responsible for the integrity of the information contained in this report and for the consistency between the MD&A and consolidated financial statements. In the preparation of the consolidated financial statements, estimates are necessary to make a determination of future values for certain assets and liabilities. Management believes these estimates have been based on careful judgments and have been properly presented. The consolidated financial statements have been prepared using policies and procedures established by management and fairly reflect Highwood's consolidated financial position and results of operations.

Refer to the end of the MD&A for commonly used abbreviations.

Readers should read "Forward-Looking Statements" at the end of the MD&A, which explains the basis for and limitations of statements throughout this report that are not historical facts and may be considered "forward-looking statements" under securities regulations.

The Company's common shares and warrants trade on the TSX Venture Exchange ("TSX-V") under the symbol "HAM" and "HAM.WT".

All figures in tables are stated in thousands of Canadian dollars, except operational and per share amounts or as noted.

Description of Business

The Company is engaged in ownership and oversight of various operations with a primary focus on oil and gas production, with operations also in midstream energy operations and metallic minerals. The Company's current focus is to advance the exploitation of its oil and gas properties in Alberta.

Corporate Highlights and Outlook

- Achieved average corporate production of 5,966 boe/d in Q4 2024, representing an increase of approximately 48% from the comparative period last year (average of 4,035 boe/d) as a result of successful 2024 drilling program.
- For the fourth quarter of 2024, Highwood delivered Adjusted EBITDA of \$19.0 million (\$1.25 per share) and adjusted funds flow of \$7.2 million (\$0.47 per share), representing increases of \$8.7 million (85%) and \$9.3 million (105%), respectively, over the comparative three-month period in 2023. (1)
- Highwood's top priority remains shareholder value where strong execution in 2024 was clearly demonstrated by NAV per share growth of approximately 35% on a PDP BTNPV10 NAV/share basis and approximately 13% on a 1P BTNPV10/share basis. Realized before-tax net present value, after debt, of booked reserves⁽¹⁾:
 - PDP BTNPV10 of \$262 million representing NAV \$10.86/share and \$10.07/share fully diluted.
 - Associated RLI of 9.1 years and delivered a recycle ratio of 2.2
 - 1P BTNPV10 of \$515 million representing NAV \$27.51/share and \$23.42/share fully diluted.
 - Associated RLI of 14.1 years and recycle ratio of 2.2
 - 2P BTNPV10 of \$819 million representing NAV \$47.61/share and \$39.54/share fully diluted.
 - Associated RLI of 21.0 years and recycle ratio of 2.9

- The Company incurred capital expenditures of approximately \$11 million in the fourth quarter of 2024, with the majority of costs related to two gross (1.5 net) wells drilled one well in Brazeau (booked) and one well in Wilson Creek (booked), along with seismic purchased in Wilson Creek and Bonnyville to assist the Company with its 2025 drilling program. The 2025 drilling program included 6 gross (4.3 net) wells drilled in the first quarter, which are expected to come onstream within 60 days.
- Highwood reiterates its guidance of a 2025 capital plan of \$60–65 million, 2025 average production guidance of 6,200–6,400 boe/d (+10% increase at midpoint), Adjusted EBITDA of \$88-92 million and a target 2025 Net Debt / 2025 Exit EBITDA ratio of approximately 0.8x. (1)(2)
- As a result of a successful drilling program that delivered significant PDP reserves growth, the Company's borrowing base has been increased from \$110 million to \$120 million during the fourth quarter of 2024. With the increase to the Company's borrowing base, the Company was able to extinguish the Promissory Note on November 26, 2024 which will result in a positive impact on interest expense with the credit facility bearing interest currently at approximately 7% per annum, compared to the 13% per annum borne by the Promissory Note. Furthermore, the early repayment will create additional financial flexibility for Highwood.

Notes to Highlights:

- (1) See "Caution Respecting Reserves Information" and "Non-GAAP and other Specified Financial Measures".
- Based on Management's projections (not Independent Qualified Reserves Evaluators' forecasts) and applying the following pricing assumptions: WTI: US\$70.00/bbl; WCS Diff: US\$14.00/bbl; MSW Diff: US\$3.75/bbl; AECO: C\$2.00/GJ; 0.73 CAD/USD. Management projections are used in place of Independent Qualified Reserves Evaluators' forecasts as Management believes it provides investors with valuable information concerning the liquidity of the Company.

Operational Update

With continued strong commodity prices in the year ended December 31, 2024, the Company focused primarily on the execution of its capital program. During this period, the Company executed a successful \$66 million development capital program which included twelve additional wells, of which five were brought online in the first quarter, five in the third quarter and early fourth quarter of 2024 and the remainder in the first quarter of 2025. These twelve wells consisted of six fracture stimulated wells at Wilson Creek (booked), three fracture stimulated wells at Brazeau (booked) and three MLOH wells, two wells in Brazeau (two booked and one unbooked) and one well in Viking Kinsella (unbooked).

Highwood is set to drill six booked gross (4.3 net) wells in the first quarter or 2025. During this period, the Company's oil production has been impacted by long periods of severe cold weather, third party outages and delays in bringing new drills online. As a result, forecasted oil production for the first quarter is expected to be approximately 2,750 - 3,000 bbl/d and total first quarter production is expected to be 5,100 - 5,300 boe/d. Highwood still expects to achieve 2025 average production of 6,200 - 6,400 boe/d, as previously guided.

Outlook

The primary focus over the near-term is the execution of the Company's 2025 capital program while continuing to focus on shareholder returns. At December 31, 2024, Highwood had over \$300 million in tax pools, including more than \$100 million in non-capital losses. Highwood does not anticipate being cash taxable for approximately three years.

Highwood is continuing to evaluate its undeveloped lands for drilling opportunities and is planning to continue its active capital program while commodity prices remain strong.

Corporately, the Company is dedicated to growing Free Cash Flow, on a per share basis, while using prudent leverage to provide maximum flexibility for organic growth and/or other strategic M&A opportunities, with a longer-term goal to provide significant return of capital to shareholders. The Company will also continue to assess land offerings in strategic areas where the Company sees significant growth opportunities.

PART 1 – OUR BUSINESS AND STRATEGY

Overview

Highwood is a junior asset manager with a current focus primarily in the upstream oil and gas space, as well as midstream oil and gas. Highwood's intention is to eventually oversee various operations including Environmental, Social and Governance ("ESG") and other clean energy transition subsectors, which include metallic minerals, clean energy technologies, upstream and midstream oil & gas production & processing.

✓ Shareholder Return Focus

Steering future accretive acquisitions and organic growth opportunities will be prudent for shareholder returns.

✓ Prudent Debt Adjusted Cashflow per Share Growth

Highwood will focus on growing production through a combination of executing capital plans and acquisitions. Current focus of the capital plan will be on developing the assets acquired in the Acquisitions and focusing on locations with strong rates of return and payouts of less than a year.

✓ Debt Reduction

Committed to reducing Highwood's leverage profile with an aim to be approximately 0.8x Net Debt/2025 Exit EBITDA.

✓ Sustainability

The Company is committed to having a positive impact in the communities in which they operate – setting partnerships up for long term successes.

PART 2 – SUMMARY OF CONSOLIDATED FINANCIAL RESULTS

Highwood Asset Management Ltd. – Consolidated Financial and Operating Highlights

(all tabular amounts expressed in \$000's, except share numbers) (Canadian dollars)

	Three months ended December 31,			Year ended December 31,		
	2024	2023		2024	2023	
Financial

Operating netback (per boe) (7)	36.58	32.42		38.30	35.54	

⁽¹⁾ Includes realized and unrealized gains and losses on commodity contracts.

⁽²⁾ Working capital deficit excludes commodity contract net asset of \$1.0 million (December 31, 2023 – \$5.5 million), current portion of decommissioning liability of \$1.6 million (December 31, 2023 - \$1.6 million) and current portion of lease liabilities of \$317 thousand (December 31, 2023 - \$178 thousand).

⁽³⁾ Net debt consists of bank debt, promissory note, long-term accounts payable and accrued liabilities and working capital deficit excluding commodity contract assets and/or liabilities, current portion of decommissioning liabilities and lease liabilities.

⁽⁴⁾ Shares outstanding is adjusted for treasury shares purchased and held in trust

⁽⁵⁾ For a description of the boe conversion ratio, see "Basis of Barrel of Oil Equivalent".

⁽⁶⁾ Before hedging.

⁽⁷⁾ See "Non-GAAP and other Specified Financial measures".

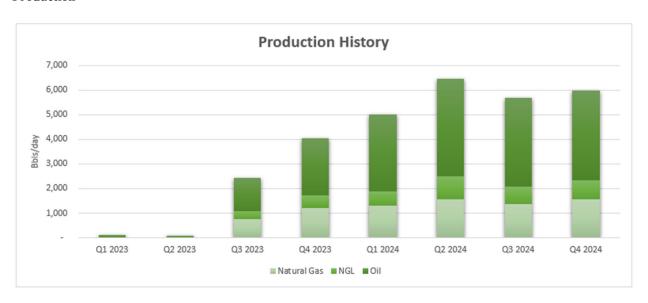

PART 3 – OPERATING RESULTS

Basis of Presentation

In the third quarter of 2023, the Company closed the acquisitions of Boulder Energy Ltd., Castlegate Energy Ltd., and Shale Petroleum Ltd., (collectively the "Acquisitions").

Summary of Results

Production

	Three m	onths ended		Year ended	
	D	December 31,		December 31,	
	2024	2023	2024	2023	
Daily average volume					
Crude oil (bbls/d)	3,638	2,306	3,580	978	
NGL (boe/d)	775	526	752	210	
Natural gas (mcf/d)	9,319	7,215	8,695	2,969	
Total sales (boe/d)	5,966	4,035	5,781	1,682	
Total sales (boe)	548,904	371,238	2,115,689	614,043	
Production weighting					
Crude oil and NGL	74%	70%	75%	71%	

Production significantly increased during the year ended December 31, 2024 as compared to the same period in 2023 mainly due to Acquisitions during the third quarter of 2023. The production increase during the three months ended December 31, 2024 as compared to the same period is 2023 is due to the successful drilling campaigns the Company executed during 2024. In total, the Company drilled 12 gross wells in 2024, bringing 11 of those wells on production. The last well spud in 2024 was in December, this well was completed and brought online in the first quarter of 2025. Highwood realized growth in overall production and crude oil and NGL weighting as it executed a capital plan of ~\$66 million in 2024, of which ~\$56 million related to Development Capital.

Petroleum and Natural Gas Sales

	Three	e months ended December 31,		Year ended
	2024	2023	2024	December 31, 2023
Crude oil	\$ 30,672	\$ 20,171	\$ 122,913	\$ 35,496
NGL	2,104	1,754	8,740	2,869
Natural gas	999	1,708	4,141	2,847
Total	\$ 33,775	\$ 23,633	\$ 135,794	\$ 41,212
Average realized prices before hedging				
Crude oil (\$/bbl)	91.63	95.07	93.82	99.44
NGL (\$/boe)	29.51	36.22	31.76	37.52
Natural gas (\$/mcf)	1.17	2.57	1.30	2.63
Equivalent (\$/boe)	61.53	63.66	64.18	67.12

Petroleum and natural gas revenue increased significantly for the three months and year ended December 31, 2024 compared to the same periods in 2023, driven primarily by the Acquisitions that closed on August 3, 2023 and the additional production from the capital activity the Company executed since the acquisitions with 16 gross wells drilled from the third quarter of 2023 to December 31, 2024.

For the three months and year ended December 31, 2024 as compared to the comparative periods of 2023, the Company saw a decrease in average realized oil price, due to decreased average commodity prices. The majority of Highwood's oil production is light oil and benchmarked to Edmonton light pricing while natural gas is benchmarked to AECO pricing. Overall, the production mix in the three months and year ended December 31, 2024 is \sim 75% liquids (three months and year ended December 31, 2023 \sim 71%).

Western Canadian commodity prices continued to be volatile in 2023 and during 2024. In the short term, the Company anticipates continued price volatility. With respect to oil prices, significant factors include the unknown impact of transportation constraints in Alberta, tariffs, geopolitical issues, demand levels, as well as global inventory levels. The Company continues to monitor current and forecasted pricing.

Royalties

	Three m	onths ended		Year ended
	D	ecember 31,		December 31,
	2024	2023	2024	2023
	\$	\$	\$	\$
Royalties	7,282	6,173	29,815	10,520
Per boe	13.27	16.63	14.09	17.13
Percentage of sales	21.6%	26.1%	22.0%	25.5%

Highwood's royalty burden includes crown, gross over-riding and freehold royalties applicable on the Company's production sales, which are either paid or taken in kind. The terms of the land and mineral rights owner agreements and provincial royalty regimes impact Highwood's overall royalty rate.

The increase in royalties for the three months and year ended December 31, 2024 to the comparative periods in 2023 is driven by the increased production and sales from the Acquisition and the execution of the Company's capital program since acquiring the assets.

During the three months and year ended December 31, 2024, compared to the same periods in 2023, royalties as a percentage of sales decreased, mainly due to additional Drilling and Completion Cost Allowance ("C*") on wells drilled in the back half of 2024, along with a reduction in Crown oil par prices relative to benchmark pricing. The royalty rate is sensitive to commodity prices, and as such, a change in commodity pricing will impact the actual rate.

Operating and Transportation Expense

	Three months ended December 31,			Year ended December 31,
	2024	2023	2024	2023
	\$	\$	\$	\$
Total operating and transportation	6,697	5,647	26,088	10,242
Per boe	12.20	15.21	12.33	16.68
Less midstream and other operating ¹	(286)	(224)	(1,141)	(1,369)
Upstream operating and transportation	6,411	5,423	24,947	8,873
Per boe	11.68	14.61	11.79	14.45

Amounts removed are operating costs related to midstream operations or metallic minerals operations. The purpose is to show the operating cost associated with each barrel of production.

Overall total operating and transportation expenses have increased significantly due to the increased production from the Acquisitions and the Company's capital program, which is also the reason for the decrease in total operating and transportation expenses per boe.

The midstream and other operating expenses mainly relate to the Wabasca River Pipeline System and EVI Terminal and these costs are removed from total operating and transportation expenses to show the operating and transportation costs associated with flowing barrels of production. Overall, these costs are fairly consistent year over year.

The Company has been actively working to reduce costs, by conducting abandonment and reclamation work on the non-producing properties, as well as reducing costs such as surface and mineral rentals. The Company is also assessing opportunities that are available with the Company's asset base to reduce operating and transportation costs and increasing operational efficiencies, such as using infrastructure the Company owns rather than through third parties for assets that were acquired within close proximity and taking over operatorship of assets.

Netback Analysis

	Three mo	onths ended		Year ended
	De	ecember 31,		December 31,
	2024	2023	2024	2023
	\$/boe	\$/boe	\$/boe	\$/boe
Average sales price	61.53	63.66	64.18	67.12
Royalties	(13.27)	(16.63)	(14.09)	(17.13)
Upstream Operating and transportation	(11.68)	(14.61)	(11.79)	(14.45)
Operating netback	36.58	32.42	38.30	35.54

Operating netback reflects the profit that is made from each barrel of production, which is why upstream operating and transportation expenses are used in the calculation. While the average royalties and operating costs per boe decreased during the current periods, the overall decrease in operating netback per boe for the three months and year ended December 31, 2024 as compared to the three months and year ended December 31, 2023 is due primarily to a decrease in average realized sales prices per boe. Management continues to look at ways to maximize the operating netback.

Transportation Pipeline Revenues

The Company owns an interest in the Wabasca River Sales Pipeline, EVI Terminal and marketing revenues. Revenues are generated from a tariff charged to vendors who transport product on the pipeline. The EVI Terminal has a butane blending operation that generates revenues from the purchase and sale of butane. The EVI Terminal also has a heavy oil trucking facility which is currently not operational, however, the Company is assessing reactivating this portion of the terminal.

The Company's crude transmission line averaged throughput of 8,619M3/month and 9,095M3/month, respectively, during the three months and year ended December 31, 2024. Volumes were down slightly in the fourth quarter of 2024 as compared to the first three quarters of 2024 primarily due to third party production outages and natural declines of

the third-party producers production. The Company anticipates additional volumes coming onto the pipeline as area producers continue to revive capital activity in the continued strong price environment. The Company is encouraged by the capital activity during 2024 and expected capital activity in 2025 by producers in the area.

	Three months ended		Year ended	
	D	December 31,		December 31,
	2024	2023	2024	2023
Transportation pipeline revenues	\$ 621	\$ 664	\$ 2,670	\$ 2,867

Overall, the decrease in transportation pipeline revenues in the current period is due to a decrease in volumes flowing through pipeline. Transportation pipeline revenues are generated on a tariff of \$24.50/M3 of crude oil that is flowed through the pipeline.

Metallic Minerals

The metallic minerals segment includes industrial metal and mineral assets. During 2021, the Company amassed industrial metallic and mineral permits covering over 3.8 million acres in Alberta and British Columbia and issued its first National Instrument 43-101 Technical Report on Lithium from Brine on July 16, 2021 and an additional 43-101 Technical Report over the Ironstone prospective permits held by the Company on September 21, 2021. The Company also engaged the third-party resource evaluator to compile a 43-101 Resource Assessment specific to Drumheller, Alberta over the Lithium Brine prospective permits, which was completed February 21, 2022.

During the three months and year ended December 31, 2024, the company incurred capital expenditures of approximately \$nil and \$1.4 million to convert the majority of the industrial metallic and mineral permits into leases.

As the metallic minerals segment entails early-stage exploration projects, there was no revenue and minimal operating expenses associated with the segment for the three months and year ended December 31, 2024 and 2023.

As Highwood assesses additional information on its lithium Sub-properties, Highwood will continue to evaluate value maximization paths for its lithium assets including a potential public pure play, low carbon intensity lithium company spinout. In the event that the Company, or a spinout of the Company, is successful in raising funds through an equity raise that is being contemplated, the Company plans, and may be required, under the equity raise to outlay significant exploration capital in the near future.

Extraction technologies continue to be evaluated as well as potential go forward technology parties whom Highwood may elect to partner with moving forward.

PART 4 – SELECT CONSOLIDATED FINANCIAL DISCLOSURES

Risk Management

Highwood's cash flow is variable as oil and natural gas are commodities whose prices are determined by worldwide and/or regional supply and demand, transportation constraints, weather conditions, availability of alternative energy sources and other factors, all of which are beyond Highwood's control. World prices for oil and natural gas have remained fairly consistent in recent months but continue to be volatile.

Management of cash flow variability is an integral component of the Company's business strategy. Business conditions are monitored regularly and reviewed with the Board of Directors to establish risk management guidelines used by management in carrying out the Company's strategic risk management program.

The Company has elected not to use hedge accounting and, accordingly, the fair value of the financial contracts is recorded at each period-end. The fair value may change substantially from period to period depending on commodity forward strip prices for the financial contracts outstanding at the statement of financial position date. The change in fair value from period-end to period-end is reflected in the income for that period. As a result, income may fluctuate considerably.

The Company has the following commodity contracts outstanding at December 31, 2024 as required under the ARCA: Swaps:

	Notional		Contract Price	
Product	Volume	Term	(CAD/GJ)	Index
Natural Gas	4,600GJ/day	Sept 1, 2023 to March 31, 2025	\$ 3.00 - \$ 3.05	AECO

Product	Volume	Term	(CAD/MWh)	Index
Electricity	500 MWh/month	September 1, 2024 to July 31, 2026	\$ 55.75	Alberta Power Pool – AESO (Flat)

The commodity contracts had a total fair value at December 31, 2024 of an asset of \$1.4 million (2023 – \$6.02 million). The corresponding unrealized gain (loss) for the year ended December 31, 2024 was \$4.6 million (2023 unrealized gain – \$6.02 million). Total realized gain (loss) for the year ended December 31, 2024 was \$2.4 million ((2023 – (\$118 thousand)).

Subsequent to December 31, 2024, the Company entered into the following commodity contracts:

Swaps:

Product	Notional Volume	Term	Contract Price (CAD/GJ)	Index
Natural Gas	400GJ/day	November 1, 2025 to March 31, 2028	\$ 3.00	AECO

	\$	\$	\$	\$	
Realized gain (loss) on commodity contracts	1,077	236	2,409	(118)	
Unrealized gain (loss) on commodity contracts	(7,583)	9,845	(4,477)	5,863	

General and Administrative (G&A)

	Three months ended December 31,		Year ended December 31,	
	2024	2023	2024	2023
	\$	\$	\$	\$
Gross G&A	1,970	2,054	8,357	5,668
Capitalized G&A	(420)	(170)	(1,590)	(270)
G&A	1,550	1,884	6,767	5,398
G&A/boe	2.82	5.07	3.20	8.79

G&A expenses decreased during the three months ended December 31, 2024, compared to the respective period in 2023 mainly due to some additional costs that were incurred in the third quarter of 2023 with respect to the Acquisitions, moving related costs and a focus by the Company to reduce costs where possible.

Overall G&A expenses increased during the year ended December 31, 2024, compared to the respective period in 2023 mainly due to increased staffing requirements associated with the Acquisitions and overall growth of the Company. As part of the Acquisition, Highwood has seen a growth in employees and consultants that are vital to the Company achieving the objectives of shareholder returns and debt reduction. The increase is also due to inflationary pressures which have increased costs of goods and services.

Share-based Compensation

	Three months ended			Year ended		
		December 31,		December 31,		
	2024	2023	2024	2023		
	\$	\$	\$	\$		
Share-based compensation	605	190	1,987	420		

The increase in share-based compensation during the three months and year ended December 31, 2024 from the comparative periods of 2023 is mainly due to the granting of options, Restricted Share Units ("RSU's"), and Performance Share Units ("PSU's") and Deferred Share Units ("DSU's") in August 2023, January 2024, April 2024, October 2024 and November 2024. The increase is also partially due to the implementation of the Employee Share Purchase Plan ("ESPP").

Depletion and Depreciation ("D&D")

	Three months ended		Year ended		
	Dec	December 31,			
	2024	2023	2024	2023	
	\$	\$	\$	\$	
D&D	6,896	4,042	25,923	7,309	
Per boe	12.56	10.89	12.25	11.90	

The increase in D&D for the three months and year ended December 31, 2024, as compared to the prior periods, is as a result of the Acquisitions that occurred during the third quarter of 2023, along with development capital expenditures during the three months and year ended December 31, 2024 totaling approximately \$9.5 million and \$56 million, respectively. This, combined with the significant increase in production during the current periods, has resulted in the overall increase in D&D.

Impairment

The Company assesses many factors when determining if an impairment test should be performed. At December 31, 2024, the Company conducted an assessment of impairment indicators for the Company's CGU's. No indicators of impairment at December 31, 2024 were identified.

Finance Expenses

	Three mo	nths ended		Year ended	
	December 31,]	December 31,	
	2024	2023	2024	2023	
	\$	\$	\$	\$	
Interest on bank debt	2,011	2,208	8,524	3,594	
Interest on promissory note	210	459	1,576	748	
Interest income	(17)	(22)	(90)	(44)	
Cash finance expenses	2,204	2,645	10,010	4,298	
Accretion of decommissioning liabilities	238	264	920	597	
Amortization of debt issue costs	298	164	883	215	
Other expense	15	29	76	79	
Non-cash finance expense	551	457	1,879	891	
Total finance expenses	2,755	3,102	11,889	5,189	

Interest on bank debt relates to interest and fees paid to Highwood's bankers to service the bank debt. Interest on bank debt decreased slightly for the three months ended December 31, 2024, as compared to the same period last year, mainly due to lower average interest rates charged on bank balances. Overall cash finance expense decreased for the three months ended December 31, 2024 compared to the same period last year due to extinguishing the Promissory Note in late 2024.

Interest on bank debt increased for the year ended December 31, 2024, as compared to the previous year, mainly due to the increase in bank debt which is due to the capital program the Company executed during year ended December 31, 2024.

Accretion for decommissioning liabilities for the three months ended December 31, 2024 decreased slightly compared to the same period in 2023 mainly due to a slight decrease in the discount rate which is based on Bank of Canada benchmark bond rates.

Accretion of decommissioning liabilities for the year ended December 31, 2024 increased due to the Acquisitions as well as new wells that were put on production during 2024, which resulted in an increase to decommissioning liabilities, therefore increasing the associated accretion.

Interest rates for the bank debt is based on the Company's most recent quarter consolidated total debt to EBITDA ratio (as defined in the credit facility agreement).

Deferred Tax Expense

Deferred tax was an expense of \$740 thousand and \$8.6 million, respectively, for the three months and year ended December 31, 2024, compared to an expense of \$3.7 million and \$3.3 million, respectively, for the three months and year ended December 31, 2023. The expense for the three months and year ended December 31, 2024 is mainly due to the utilization of tax pools, including non-capital losses, to offset taxable income.

Income and comprehensive income

The Company realized income and comprehensive income of \$1.9 million and \$28.0 million, respectively, for the three months and year ended December 31, 2024 (income and comprehensive income of \$47.8 million and \$46.1 million, respectively, for the three months and year ended December 31, 2023). The decrease in income and comprehensive income from the comparative periods in 2023 is due to non-cash bargain gain of \$37.9 million, along with unrealized gains on commodity contracts of \$9.8 million and \$5.9 million for the three months and year ended December 31, 2023, respectively.

	Three mon Dece	ths ended ember 31,]	Year ended December 31,

Working capital surplus/deficit excludes commodity contract asset/liability, current portion of decommissioning liability and current portion of lease liabilities.

Inherent to the nature of the energy industry, fluctuations in Highwood's quarterly petroleum and natural gas sales, transportation pipeline revenues, and income or loss are primarily caused by variations in production volumes, realized commodity prices and the related impact on royalties, realized and unrealized gains/losses on financial instruments, changes in per-unit expenses, and deferred income taxes. Please refer to the Operating Results and Select Consolidated Financial Disclosures sections above for an explanation of changes.

Capital Activity

	Three months ended December 31,		Year ended	
				December 31,
	2024	2023	2024	2023
	\$	\$	\$	\$
Land and leases	272	317	8,094	1,364
Seismic and other pre-drilling costs	1,328	149	1,992	157
Production equipment and facilities	1,105	981	6,600	1,667
Drilling and completions	8,391	13,224	49,128	15,513
Other	(97)	-	608	-
Corporate	-	66	29	66
-	10,999	14,737	66,451	18,767

At December 31, 2024, the Company had E&E assets of \$8.0 million (December 31, 2023 – \$1.5 million). This amount is mainly related to undeveloped upstream oil and gas lands and exploration activities where technical feasibility has not yet been determined, along with conversion of lithium permits to leases in the first quarter of 2024.

At December 31, 2024, the Company had gross property and equipment of \$263.0 million (December 31, 2023 - \$204.6 million). This included developed land and costs associated with the wells the Company has drilled and acquired to date, as well as midstream infrastructure it had acquired. The Company incurred capital expenditures of \$66.5 million during the year ended December 31, 2024, mainly related to drilling and completions activities.

PART 5 – CAPITALIZATION

Share Capital and Share Based Compensation Activity

As at December 31, 2024, the Company had 15,151,347 common shares, 3,150,000 warrants, 414,656 options, 215,513 RSUs, 50,000 DSUs outstanding and 482,060 common shares held in trust related to the PSU plan.

As at date of this MD&A, the Company had 15,152,813 common shares, 3,150,000 warrants, 695,067 options, 356,318 RSUs, 70,000 DSUs outstanding and 572,476 common shares held in trust related to the PSU plan.

During the year the Company granted 286,000 options at an exercise price of \$6.00 per option. The options granted vest 1/3 on each of the annual anniversary dates and have a five-year term.

During the year the Company granted 134,525 RSUs. The RSUs granted vest 1/3 on each of the annual anniversary dates. In addition, 38,491 RSUs were exercised resulting in 38,491 common shares being issued.

During the year the Company granted \$1.8 million worth of PSUs. The PSUs have a performance date three years from date of grant.

During the year the Company granted 40,000 DSUs. The DSUs granted vest one-year from the grant date.

During the year ended December 31, 2024, 10,000 DSU's were forfeited.

Subsequent to December 31, 2024, the Company granted 140,805 RSU's, 280,411 Options, \$980 thousand worth of PSU's and 20,000 DSU's. The exercise price of the Options will be the higher of \$6.00 and the market closing price on March 21, 2025.

Liquidity, Capital Resources and Capital Management

Capital Management

Net Debt

The Company considers net debt a key capital management measure in assessing the Company's liquidity.

The following table outlines the Company's calculation of net debt:

	December 31, 2024	December 31, 2023
Adjusted current assets ¹	\$ 31,928	\$ 23,951
Adjusted current liabilities ¹	(39,041)	(37,818)
Adjusted working capital	(7,113)	(13,867)
Bank debt	(90,719)	(72,464)
Promissory note – long term portion	-	(10,500)
Other long-term obligations		(220)
Total net debt	\$ (97,832)	\$ (97,051)

Note 1: Adjusted current assets and current liabilities excludes commodity contracts, current portion of lease liabilities and current portion of decommissioning obligations.

Net debt is consistent from the prior year with cash flows generated from operations primarily going to funding capital expenditures.

Adjusted EBITDA

The Company considers adjusted EBITDA to be a key capital management measure as it demonstrates the Company's profitability, operating and financial performance with respect to cash flow generation, adjusted for interest related to its capital structure. Adjusted EBITDA is calculated by adjusting cash flows from operating activities for changes in non-cash working changes and interest.

Adjusted funds flow

The Company considers adjusted funds flow to be a key capital management measure as it demonstrates the Company's ability to generate required funds to manage production levels and fund future capital investment. Management believes that this measure provides an insightful assessment of the Company's operations on a continuing basis by removing certain non-cash charges, decommissioning expenditures, of which the nature and timing of expenditures may vary based on the stage of the Company's assets and operating areas, and transaction costs which vary based on the Company's acquisition and disposition activity. The Company calculates adjusted funds flow as adjusted EBITDA less net interest and adjusting for decommissioning expenditures incurred.

Free funds flow

The Company considers free funds flow to be a key capital management measure as it is used to measure liquidity and efficiency of the Company by measuring the funds available after capital investment available for debt repayment, to pursue acquisitions and shareholder distributions. The Company calculates free funds flow as adjusted funds flow less expenditures on property, plant and equipment and exploration and evaluation assets (collectively, the "capital expenditures").

The following table outlines the Company's calculation of adjusted EBITDA, adjusted funds flow and free funds flow to cash flow from operating activities:

	Three Month December		Year Ended December 31,		
	2024	2023	2024	2023	
Cash flow from operating activities	\$ 18,368	\$ 7,066	\$ 65,777	\$ 16,376	
Change in non-cash working capital	(1,577)	747	3,357	(2,503)	
Net interest ¹	2,204	2,645	10,010	4,298	
Adjusted EBITDA	18,995	10,458	79,144	18,171	
Decommissioning expenditures	1,370	1,244	1,616	1,364	
Net interest ¹	(2,204)	(2,645)	(10,010)	(4,298)	
Adjusted funds flow	18,161	9,057	70,750	15,237	
Net capital expenditures, net	(10,999)	(14,737)	(66,451)	(18,509)	
Free funds flow	\$ 7,162	\$ (5,680)	\$ 4,299	\$ (3,272)	

 $Note\ 1:\ Net\ interest\ is\ interest\ on\ bank\ debt\ and\ promissory\ note\ less\ interest\ income$

The increase in Adjusted EBITDA, Adjusted funds flow and Free funds flow for the three months and year ended December 31, 2024, compared to the same periods in 2023, is primarily due to the increased production in those periods.

The Company makes adjustments to capital employed by monitoring economic conditions and investment opportunities. The Company generally relies on credit facilities and cash flows from operations to fund capital requirements. To maintain or modify its capital structure, the Company may issue new common or preferred shares, issue new subordinated debt, renegotiate existing debt terms, or repay existing debt. The Company is not currently

subject to any externally imposed capital requirements, other than covenants on its Amended and Restated Credit Agreement (the "ARCA").

<u>Liquidity and Capital Resources</u>

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with the financial liabilities as they become due. The Company's financial liabilities, excluding commodity contracts consist of accounts payable and accrued liabilities and bank debt.

The Company has an Amended and Restated Credit Agreement (the "ARCA"). The ARCA is comprised of senior secured extendible revolving credit facilities in the aggregate principal amount of up to \$120 million with a syndicate of banks. The ARCA is comprised of revolving credit facilities consisting of a \$10 million operating facility and a syndicated loan facility to a maximum of \$110 million as amended during the year. The ARCA allows the Company to enter into Letters of Credit up to a maximum of \$20 million. In conjunction with the amendment to the ARCA, the term out date was amended from August 3, 2024 to August 2, 2025. At December 31, 2024, the Company was drawn \$91.95 million on the credit facility.

At December 31, 2024, the Company had a working capital deficit of \$7.1 million, excluding commodity contract asset and liability, current portion of decommissioning liability, and current portion of lease liabilities. The working capital deficit at December 31, 2024, was mainly driven by the capital program incurred during the third quarter of 2024. During the fourth quarter of 2024, the Company reduced the working capital deficit through increased cash flow in the fourth quarter with increased production and minimal capital activity. The Company expects to repay its financial liabilities in the normal course of operations and to fund future operational and capital requirements through operating cash flows and available capacity on the Company's ARCA. The maturity date of the bank debt is August 2, 2026; therefore, all bank debt has been classified as long-term.

The Company monitors liquidity risk through cost control, debt and equity management policies. Strategies include continuously monitoring of forecast and actual cash flows, financing activities and available credit available under the ARCA. The nature of the oil and gas industry is very capital intensive. The Company prepares annual capital expenditure budgets and utilizes authorizations for expenditures and capital committees for projects to manage capital expenditures.

The Company may need to conduct asset sales, equity issues or issue debt if liquidity risk increases in a given period. Liquidity risk may increase as a result of potential revisions to the Company's ARCA, which is subject to semi-annual reviews. Company also maintains and monitors a certain level of cash flow which is used to partially finance all operating and capital expenditures. The Company believes it has sufficient funds and operating cash flows to meet foreseeable obligations by actively monitoring its credit facilities and coordinating payment and revenue cycles each month. However, there are no assurances that the lender will maintain the borrowing base at the current level, which may result in a borrowing base shortfall. If the Company cannot generate sufficient funds to meet the borrowing base shortfall it would constitute an event of default under the loan agreement and the bank could demand immediate repayment of the outstanding loan amount. The Company actively monitors covenants associated with the credit facilities and was in compliance at December 31, 2024.

The following table details the Company's financial liabilities, excluding commodity contracts, as at December 31, 2024:

	Total	<1 year	1-3 years	4-5 year	·s
Accounts payable and accrued liabilities	\$ 39,041	\$ 39,041	\$ -	\$	_
Bank debt	90,719	-	90,719		-
Lease liabilities	530	317	213		-
Total financial liabilities	\$ 130,290	\$ 39,358	\$ 90,932	\$	-

The Promissory Note, originally issued on August 3, 2023 was set to mature on July 1, 2025 with equal payments of \$3.5 million each on January 1, 2025, April 1, 2025 and July 1, 2025, with the outstanding principal (if any) due in full on maturity. The Promissory Note bore interest at 13% per annum payable quarterly. On November 26, 2024, the

Company paid the full principal balance and accrued interest outstanding and the Promissory Note and related guarantee was extinguished and released.

Commitments

Total expected payments, for the Company's office premise and vehicles recorded as lease obligations are:

	Within 1 year	After 1 year but not	Total
		more than 5 years	
Gross lease payments	\$ 358	\$ 220	\$ 578

Off-Balance-Sheet Arrangements

The Company does not have any special-purpose entities nor is it a party to any arrangements that would be excluded from the statement of financial position.

Environmental Initiatives Affecting Highwood

The oil and gas industry has a number of environmental risks and hazards and is subject to regulation by all levels of government. Environmental legislation includes, but is not limited to, operational controls, site restoration requirements and restrictions on emissions of various substances produced in association with oil and natural gas operations. Compliance with such legislation could require additional expenditures and a failure to comply may result in fines and penalties which could, in the aggregate and under certain unlikely assumptions, become significant. Operations are continuously monitored to minimize the environmental impact and capital is allocated to reclamation and other activities to mitigate the impact on the areas in which we operate.

Related-Party Transactions

(a) Key management compensation

The remuneration of the key management personnel of the Company, which includes directors and officers is set out below in aggregate:

		Years ended December 31,		
	2	024	2023	
Salaries, bonuses and consulting fees	\$ 2,	751	\$ 1,523	
Share based compensation	1,	360	361	
Total key management compensation	\$ 4,	111	\$ 1,884	

PART 6 – OTHER

Changes in Accounting Pronouncements

New accounting standards

On January 1, 2024, Highwood adopted the amendments to IAS 1 – *Presentation of Financial Statements* ("IAS 1"), issued by the IASB, which clarifies the requirements for presenting liabilities as current or non-current in the statement of financial position and specify the classification and disclosure of liabilities with covenants. These amendments to IAS 1 did not have an impact on the Company's financial statements.

Future changes in accounting standards

The Company has reviewed amended accounting pronouncements that have been issued but are not yet effective and determined that the following pronouncements may impact the Company, of which the Company is currently evaluating.

Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)

In May 2024, the IASB issued narrow scope amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures, regarding the settlement of financial liabilities via electronic payment systems and the assessment of contractual cashflow characteristics of financial assets.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026.

Presentation and Disclosure in Financial Statements (IFRS 18)

Highwood is currently evaluating the implications of IFRS 18, as it introduces significant changes to certain financial statement disclosures. These include the requirement to categorize income and expenses into operating, investing, financing, and tax-related activities within the profit and loss statement. IFRS 18 also mandates the disclosure of Management-Defined Performance Measures, which are non-GAAP metrics used internally by management. Additionally, the standard establishes more detailed guidelines for aggregating and disaggregating financial data, aiming to further enhance transparency and comparability in financial reporting.

IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027, with early adoption permitted.

Canadian Sustainability Reporting Standards (CSDS 1 and CSDS 2)

In December 2024, the Canadian Sustainability Standards Board ("CSSB"), released the final versions of the Canadian Sustainability Reporting Standards, CSDS 1 and CSDS 2 (collectively, the "Canadian Standards"). Currently the adoption of the Canadian Standards remains voluntary. These standards closely align with the ISSB's international sustainability standards IFRS S1 and IFRS S2, but include certain differences, particularly around timing of adoption. Currently the adoption of the Canadian Standards remains voluntary, while the Canadian Securities Administrators are currently evaluating how and to what extent they will be incorporated into future reporting requirements. The impact and costs to comply with these standards has not yet been quantified.

Critical Accounting Judgments, Estimates and Policies

The Company's critical accounting judgements, estimates and policies are described in notes 2 and 3 to the December 31, 2024 annual consolidated financial statements. Certain accounting policies are identified as critical because they require management to make judgments and estimates based on conditions and assumptions that are inherently uncertain, and because the estimates are of material magnitude to revenue, expenses, funds flow from operations, income or loss and/or other important financial results. These accounting policies could result in materially different results should the underlying conditions change or the assumptions prove incorrect.

Non-GAAP and Specified Financial Measures

This MD&A includes references to financial measures commonly used in the oil and natural gas industry. The term "operating netback" (oil and natural gas sales less royalties and production, operating and transportation expenses, all expressed on a per-unit-of-production basis) is not defined under IFRS, and may not be comparable with similar measures presented by other companies. Operating netback is a per-unit-of-production measure that may be used to assess the Company's performance and efficiency.

The term "working capital surplus (deficit), excluding bank debt" is not defined under IFRS, and may not be comparable with similar measures presented by other companies. Working capital surplus (deficit), excluding bank debt is included to show what the working capital relating to customers, vendors, and joint venture partners would be.

The term "funds flow from operations" is not defined under IFRS and may not be comparable with similar measures presented by other companies. Funds flow from operations is included to show what the cash flow from operating activities would be prior to changes in working capital and changes in long-term accounts payable and accrued liabilities.

The term "Net Debt" is not defined under IFRS and may not be comparable with similar measures presented by other companies. represents the carrying value of the Company's debt instruments, including outstanding deferred acquisition payments, net of Adjusted working capital. The Company uses Net Debt as an alternative to total outstanding debt as Management believes it provides a more accurate measure in assessing the liquidity of the Company. The Company believes that Net Debt can provide useful information to investors and shareholders in understanding the overall liquidity of the Company.

The term "EBITDA" is not defined under IFRS and may not be comparable with similar measures presented by other companies. EBITDA is used as an alternative measure of profitability and attempts to represent the cash profit generated by the Company's operations. The most directly comparable GAAP measure is cash flow from (used in) operating activities. EBITDA is calculated as cash flow from (used in) operating activities, adding back changes in non-cash working capital, decommissioning obligation expenditures and interest expense.

"Adjusted EBITDA" is calculated as cash flow from (used in) operating activities, adding back changes in non-cash working capital, transaction costs and interest expense. The Company considers Adjusted EBITDA to be a key capital management measure as it is both used within certain financial covenants anticipated to be prescribed under the ARCA and demonstrates Highwood's standalone profitability, operating and financial performance in terms of cash flow generation, adjusting for interest related to its capital structure. The most directly comparable GAAP measure is cash flow from (used in) operating activities.

"Free Cash Flow" or "FCF" is used as an indicator of the efficiency and liquidity of the Company's business, measuring its funds after capital expenditures available to manage debt levels, pursue acquisitions and assess the optionality to pay dividends and/or return capital to shareholders though activities such as share repurchases. The most directly comparable GAAP measure is cash flow from (used in) operating activities. Free Cash Flow is calculated as cash flow from (used in) operating activities, less interest, office lease expenses, cash taxes and capital expenditures.

"Net Debt" represents the carrying value of the Company's debt instruments, including outstanding deferred acquisition payments, net of Adjusted working capital. The Company uses Net Debt as an alternative to total outstanding debt as Management believes it provides a more accurate measure in assessing the liquidity of the Company. The Company believes that Net Debt can provide useful information to investors and shareholders in understanding the overall liquidity of the Company.

"2024 Exit EBITDA" is calculated as Adjusted EBITDA for the month of December annualized. The Company believes that 2024 Exit EBITDA is useful information to investors and shareholders in understanding the EBITDA generated in the final month of 2024 which is indicative of future EBITDA.

"Net Debt / 2024 Exit EBITDA" is calculated as net debt at the end of the fiscal period of 2024 divided by the 2024 Exit Adjusted EBITDA. The Company believes that Net Debt / 2024 Exit Adjusted EBITDA is useful information to

investors and shareholders in understanding the time frame, in years, it would take to eliminate Net Debt based on 2024 Exit Adjusted EBITDA.

"Run Rate Net Debt / annualized Adjusted EBITDA" is calculated as net debt at the end of the October 2024 divided by the estimated April 2024 Adjusted EBITDA. The Company believes that Run Rate Net Debt / annualized Adjusted EBITDA is useful information to investors and shareholders in understanding the time frame, in years, it would take to eliminate Net Debt based on October 2024 (being the most recent completed month) Adjusted EBITDA.

"Operating netback (per BOE)" is calculated as the realized price per boe, less royalties associated with the sale of petroleum and natural gas products on a per boe basis, less the operating costs associated with the production on a per boe basis. The Company believes that Operating netback (per BOE) is a useful measure of the profit that is made from each barrel of production.

Basis of Barrel of Oil Equivalent

Petroleum and natural gas reserves and production volumes are stated as a "barrel of oil equivalent" (boe), derived by converting natural gas to oil equivalency in the ratio of 6,000 cubic feet of gas to one barrel of oil. Boe may be misleading, particularly if used in isolation. A boe conversion ratio of 6,000 cubic feet of gas to one barrel of oil is based on energy equivalency, which is primarily applicable at the burner tip, and does not represent a value equivalency at the wellhead. Readers are cautioned that boe figures may be misleading, particularly if used in isolation. This conversion conforms to the Canadian Securities Regulator's National Instrument 51-101 – Standards for Oil and Gas Activities.

Caution Respecting Reserves Information

Readers should see the "Selected Technical Terms" in the Annual Information Form filed on March 21, 2025 for the definition of certain oil and gas terms.

Disclosure of oil and gas information is presented in accordance with generally accepted industry practices in Canada and National Instrument 51-101— Standards of Disclosure for Oil and Gas Activities ("NI 51-101"). Other than as noted herein, the oil and gas information regarding the Company presented in this news release is based on the reserves report prepared by GLJ Ltd. evaluating the crude oil, natural gas and natural gas liquids attributable to the Company's properties at January 1, 2025 (the "2024 Reserves Report").

Reserves are classified according to the degree of certainty associated with the estimates as follows:

"BT" means before tax.

"IRR" means internal rate of recovery.

"RLI" means reserves life index and is calculated as total company interest reserves divided by annual production, as per the 2024 Reserves Report.

"NPV10" represents the anticipated net present value of the future net revenue discounted at a rate of 10% associated with the reserves associated with the acquired assets.

"F&D" is calculated as the sum of field capital plus the change in FDC for the period divided by the change in reserves that are characterized as development for the period is calculated as the sum of field capital plus the change in FDC for the period divided by the change in total reserves, other than from production, for the period. Finding and development costs take into account reserves revisions during the year on a per boe basis. The aggregate of the exploration and development costs incurred in the financial year and changes during that year in estimated future development costs generally will not reflect total finding and development costs related to reserves additions for that year. Management uses F&D costs as a measure of capital efficiency for organic reserves development.

"NAV per fully diluted share" is calculated using the respective net present values of PDP, 1P and 2P reserves, before tax and discounted at 10% plus internally valued undeveloped land & seismic and proceeds from warrants and stock options, less net debt, and divided by fully diluted outstanding shares. Management used NAV per share as a measure of the relative change of Highwood's net asset value over its outstanding common shares over a period of time.

"Netback" is used to evaluate potential operating performance. Netback is calculated as follows: (Revenue – Royalties - Operating Expenses).

"Recycle Ratio" is measured by dividing the operating netback for the applicable period by F&D cost per boe for the year. The recycle ratio compares netback from existing reserves to the cost of finding new reserves and may not accurately indicate the investment success unless the replacement reserves are of equivalent quality as the produced reserves.

"Proved Developed Producing" or "PDP" reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.

"Proved" or "1P" reserves are those that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves. Reported reserves should target at least a 90 percent probability that the quantities actually recovered will equal or exceed the estimated proved reserves under a specific set of economic conditions.

"Proved plus Probable" or "2P" reserves are those that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved plus probable reserves. Reported reserves should target at least a 50 percent probability that the probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable reserves under a specific set of economic conditions.

"Drilling Location" or "Locations" - this news release discloses drilling inventory in two categories: (a) booked locations; and (b) unbooked locations. Booked locations are proposed drilling locations identified in the Year-End 2024 Reserves, as evaluated by GLJ who is the Company's independent qualified reserves evaluator, that have proved and/or probable reserves, as applicable, attributed to them in the Year-End 2024 Reserves. Unbooked locations are internal estimates based on prospective acreage and an assumption as to the number of wells that can be drilled per section based on industry practice and internal technical analysis review. Unbooked locations have been identified by members of management who are qualified reserves evaluators in accordance with NI 51-101 based on evaluation of applicable geologic, seismic, engineering, production and reserves information. Unbooked locations do not have proved or probable reserves attributed to them in the Year-End 2024 Reserves. There is no certainty that the Company will drill all unbooked drilling locations and if drilled, there is no certainty that such locations will result in additional oil and gas reserves, resources or production. The drilling locations considered for future development will ultimately depend on the availability of capital, regulatory approvals, seasonal restrictions, oil and natural gas prices, costs, actual drilling results, additional reservoir information that is obtained and other factors. While certain of unbooked drilling locations have been de-risked by the drilling of existing wells by Highwood in relatively close proximity to such unbooked drilling locations, other unbooked drilling locations are farther away from existing wells where Management has less information about the characteristics of the reservoir, and therefore, there is more uncertainty whether wells will be drilled in such locations. If these wells are drilled, there is more uncertainty that such wells will result in additional oil and gas reserves, resources or production.

Forward-Looking Statements

This document contains certain forward-looking statements. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could influence actual results or events and cause them to differ materially from those stated, anticipated or implied. Such forward-looking statements necessarily involve risks including, without limitation, those associated with oil and natural gas exploration, property development, production,

marketing and transportation, such as dry holes and non-commercial wells, facility and pipeline damage, loss of markets, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, production declines, health, safety and environmental risks, competition from other producers and the ability to access sufficient capital from internal and external sources. Forward-looking information typically includes statements with words such as "anticipate", "believe", "expect", "plan", "intend", "estimate", "propose", "project", or similar words suggesting future outcomes. The Company cautions readers and prospective investors in the Company's securities not to place undue reliance on forward-looking information as, by its nature, it is based on current expectations regarding future events that involve a number of assumptions, inherent risks and uncertainties, which could cause actual results to differ materially from those anticipated by the Company.

Forward-looking information typically involves substantial known and unknown risks and uncertainties, certain of which are beyond the Company's control. Such risks and uncertainties include, without limitation: financial risk of marketing reserves or metals & minerals at an acceptable price given market conditions; volatility in market prices for metals, minerals, oil and natural gas; delays in business operations; pipeline restrictions; blowouts; the risk of carrying out operations with minimal environmental impact; industry conditions including changes in laws and regulations including the adoption of new environmental laws and regulations and changes in how they are interpreted and enforced; uncertainties associated with estimating mining resources & oil and natural gas reserves; risks and uncertainties related to mining and oil & gas interests and operations on aboriginal lands; economic risk of finding and producing reserves at a reasonable cost; uncertainties associated with partner plans and approvals; operational matters related to non-operated properties; increased competition for, among other things, capital, acquisitions of mining permits, reserves and undeveloped lands; competition for and availability of qualified personnel or management; incorrect assessments of the value of acquisitions and exploration and development programs; unexpected geological, technical, drilling, construction, processing and transportation problems; availability of insurance; fluctuations in foreign exchange and interest rates; stock market volatility; general economic, market and business conditions; uncertainties associated with regulatory approvals; uncertainty of government policy changes; uncertainties associated with credit facilities and counterparty credit risk; changes in income tax laws. Crown royalty rates and incentive programs relating to the oil and gas industry; and other factors, many of which are outside the Company's control. The Company's actual results, performance or achievements could, therefore, differ materially from those expressed in, or implied by, these forward-looking estimates and whether or not any such actual results, performance or achievements transpire or occur, there can be no certainty as to what benefits or detriments the Company will derive therefrom.

The forward-looking information included herein is expressly qualified in its entirety by this cautionary statement. It is made as of the date hereof and the Company assumes no obligation to update or revise any forward-looking information to reflect new events or circumstances, except as required by law.
